10. How are Full Time Equivalentents (FTE's) calculated?

An FTE is the equivalent of one person working full time. Full time is considered to be 2,000 payroll hours for the year. To calculate the number of FTE's for your organization, calculate the total payroll hours worked per fiscal year by all employees, then divide by 2,000.

Note: FTE is not the total number of employees. Each employee is counted only once.

Examples: 1 staff working full time (2,000 hours) = 1 FTE
2 staff each working 4 hours per day, 5 days per week = 1 FTE
Total payroll hours for all staff of 13,200 = 6.6 FTE (13,200/2,000)

11. How will the private sector digital consultants/software/hardware providers be recruited for my project?

It is your business' responsibility and decision to engage with a private sector consultant/software or hardware provider. However, Nova Scotia Business Inc. encourages applicants to engage other Nova Scotia businesses for their project.
